### Dear Foxtrot

I wanted to let you know that I safely arrived in Lima. Yesterday we went on a tour and the guide wore a fancy uniform when he showed us the Oscar Building. In the evening we went to go see The Complete Works of William Shakespeare Abridged. The actor who played Romeo was from India. I hope you are doing well, and I will see you in November when I return. Tell little Echo that she can tell me all about the 1st grade when I return.

-Jason

In this puzzle there are eight normal dominos arranged in some pattern. The number of dots on the two sides of each domino when added together equal a letter (well, a number, but A=1, B=2, C=3, etc). However you do not know where one domino ends and another begins. This is your task to discover where the borders are and what word the dominos form.
